

CALL FOR PAPERS

Editorial board of JTIE prepares a monothematic issue:

Curriculum of technical education at basic and secondary schools

The aim of a monothematic issue is to provide a space for a theoretical and research reflection of technical education, focusing i.a. on these topics:

- tendencies and efforts for modernization – an analysis of developmental trends and perspectives,
- reflection of basic and secondary schools' curriculum of technical education in teacher training,
- historical aspects of the curriculum,
- international comparative study of technical education at basic and secondary schools,
- formative effect as an aspect of the content of technical education at basic and secondary schools,
- terminology as a part of the curriculum of technical education,
- material and non-material conditions for a realization of the curriculum of technical education at basic and secondary schools.

Additional principles of publication of articles in JTIE are available at www.jtie.upol.cz.

Guarantors of the issue are **prof. Tomáš Kozík** ([Constatnine the Philosopher University in Nitra](http://www.upol.cz)) and **assoc. prof. Jiří Dostál** ([Palacký University Olomouc](http://www.upol.cz)).

Please, send your **abstracts in the extent of one A4 page (in language of the article) by 31st October 2016**. Please, do not forget to send proper data in the abstract: name of the author (authors), name of the article, type of the article (theoretical or research study), solved problem, methods used, and a presumed extent of the whole article. Send your abstracts to j.dostal@upol.cz.
